## **Key Rating Drivers**

**Ratings Affirmed:** The City of Kielce's ratings reflect Fitch's unchanged view that the city will maintain its satisfactory operating performance, with an operating margin of 5%-7% and an operating balance sufficient to cover annual debt service.

**Opex Pressure Continues:** In 2017, Kielce reported a satisfactory operating balance of about PLN62 million (2016: PLN68 million). Operating expenditure grew by 4.7% above operating revenue growth of 3.7% (after excluding '500+' transfers). We expect Kielce's 2018 operating results to remain at the 2017 level due to ongoing opex pressure, especially on education and on salaries. Due to local elections scheduled for 2018 it is unlikely that city will implement permanent spending cuts or significantly increase local taxes and fees.

As a result, we assume a temporary deterioration in the payback ratio (debt to current balance) in 2018 to around 18 years (2017: 17.4 years), which should strengthen to below 15 years by 2020. We expect that Kielce's operating results may improve from 2019, reflecting stronger tax revenue amid growing national and local economies. We believe that the city has some ability to increase its revenue, as local tax rates are below the maximum legal limit.

**Growing Debt:** Fitch assumes that Kielce's direct debt will gradually grow in 2018-2020 as a result of financing infrastructure investment while remaining below 75% of current revenue. At end-2017, direct debt was PLN765 million or 68% of current revenue (2016: PLN705 million or 66%).

**Increasing capex:** Capital expenditure rose to PLN188 million in 2017 from PLN139 million in 2016. We expect capex of PLN230 million-PLN250 million per year in 2018-2020 (or 16%-17% of total expenditure), as the city is conducting investments co-financed from the EU funds. The city's main investment areas are: local infrastructure, including local roads; the technological park; public transport; and housing. We expect that half of capex will be financed from capital revenue (mainly EU grants), while the rest will be from the current balance and new debt.

**Sound Management Practices:** The city's authorities present a safe approach to budgeting. The city's operating revenue budgeting is prudent and actual revenue is usually higher than originally planned at the beginning of the year. We believe that the city has some ability to increase its revenue, as local tax rates are below the maximum legal limit. We also note that sustained control over operating spending will be key to maintaining the current ratings.

**Moderate Economy:** Kielce is a medium-sized city in Poland (ca. 200.000 inhabitant) with a diversified economy, but weaker than other cities that are also capitals of their respective regions. GDP per capita in 2015 for the Kielecki sub-region, which includes Kielce and surrounding villages, was 79% of the national average. We estimate the city's wealth indicators are on a par with the national average, as Kielce is the strongest area in the sub-region. Fitch projects that Poland's real GDP will grow by 3.4% annually in the medium term.

## **Rating Sensitivities**

**Deterioration of Debt Matrix:** A failure to re-strengthen the debt-to-current balance ratio below 15 years on a sustained basis or a significant increase in net overall risk to above 100% of current revenue could lead to a downgrade.

**Improvement of Operating Results:** The ratings could be upgraded if the city improves its operating margin toward 10% and maintains a moderate debt level.
